Summary

Full-stack developer with nearly 3 years of experience in web technologies. Passion for modern front end and back end. Also interested in DevOps, Serverless, UX, UI, and PM.

I'm looking for a position that will fulfill my skills, interpersonal communication, interaction in a team and multitasking.

Skills

- Algorithmic thinking & Object oriented programming
- Responsive design and Mobile first
- Building web pages: HTML5, CSS3, SASS, Bootstrap and jQuery
- Working with Back-Ends using AJAX and REST
- NPM and GIT
- AngularJS A-Z.
- Angular 2-6
- Integration with social networks
- Unit Testing, Integration Testing and TDD
- Module loaders, RequireJS, Typescript, Frontend security

Education

2009-2012: BA, Peres Academic Center
2000-2001: Computer Technician, Ort Rehovot
1998-2000: Computer Science Major, Ort High School, Rehovot

Work Experience

2016 - 2018: Full Stack Developer, Zinkerz Technologies.

I built several core features in our apps and provide maintenance to the entire code base. One of the daily challenges is the context switch between the different apps and our technologies.

2016 - 2017: Front-End Developer, Misterbit.

Used as front-end developer in several project in different companies.

Among the companies:

TOM - Tikkun Olam Makers,

Taptica - Global mobile advertising,

Zinkerz - Education Management.

2015: Frontend (Javascript) Bootcamp, Coding Academy / MisterBit.

An intensive coding bootcamp (over 400 hours) that qualifies Front-End (Javascript) developers.

As part of the intensive Frontend (Javascript) Bootcamp, built several projects with various complexities, all code are available in GIT for code review.
